https://www.linkedin.com/in/amala-mohan-62586a33b/

## PROFESSIONAL SUMMARY

**Combined Major** student at UBC studying **Computer Science** and **Mathematics**, with a strong foundation in web development, data visualization, matrix algebra, and calculus. Built user-focused solutions through hackathons and academic projects using JavaScript, Python, and APIs. Skilled in problem-solving, UI/UX design, and translating data into actionable insights. Seeking entry-level opportunities in software development and data-driven roles.

## CORE COMPETENCIES

API Integration | Data Visualization | UI/UX Design, Debugging & Testing | Performance Optimization| Project Design & Architecture |Version Control & Reproducibility | AI/ML Fundamentals | Stakeholder Collaboration

## TECHNICAL SKILLS

- Languages: Python, Java, JavaScript, HTML, CSS, SQL, Racket,TypeScript
- Tools & Platforms: VS Code, Git, GitHub, Chrome Extension APIs, Gemini AI API

## EDUCATION

- B.Sc. Combined Major Computer Science and Mathematics, University of British Columbia (UBC) - [Expected Graduation year: 2029]
- Grade 12: Computer Science

## CERTIFICATIONS

- Python for Data Science, AI and Development, IBM
- Supervised Machine Learning, Stanford (Regression & Classification, Advanced Learning Algorithms, Unsupervised Learning, Recommenders & Reinforcement Learning)

## ACHIEVEMENTS

- Selected for Accenture Innovation Challenge; contributed to a 3-member team building data-driven housing solutions. Recently selected a finalist for this comp. Ranked 2nd place as one of the top 4 finalists among 12–14 teams in a competition held in Toronto.
- Built and programmed an autonomous EV3 robot, securing 4th place at state level WRO competition (World robotic Olympiad).
- Delivered rapid prototypes in agile team environments, improving development speed and collaboration.

## PROJECTS

**PRAIRIE JOURNAL - CHROME EXTENSION | NWHACKS HACKATHON** **MAR 2026**

- Built a Chrome extension for PrairieLearn using JavaScript, HTML5, and CSS3 to help students track mistakes and revisit key concepts.
- Architected & led UI/UX for the extension popup and journal interface, translating wireframes into an intuitive, user-friendly experience.

- Integrated Gemini AI API to deliver intelligent suggestions, strengthening hands-on experience in API integration and debugging.
- Optimized application performance using techniques such as image compression, code minification, and lazy loading.
- Collaborated within a 3-member cross-functional team in a fast-paced hackathon to deliver a fully functional end-to-end product.

**MARPOLE COMMUNITY DATA WEBSITE | VOLUNTEER AT CCEL** **FEB 2026**

- Architected a data-centric community website using HTML, CSS, and JavaScript to showcase local activity trends.
- Embedded interactive visualizations, including charts and maps to make complex data easily understandable for public.
- Built a public-facing website using HTML, CSS, and JavaScript to visualize lifestyle patterns and wellbeing data of elderly communities.
- Utilized the data provided & transformed complex data into an intuitive website, enabling users to easily access and understand insights without navigating raw datasets. Managed version control & deployed the project via GitHub, ensuring accessibility and maintainability.

## LEADERSHIP & INVOLVEMENT

**Web Designer**

*Girls in STEAM UBC | 2026 – 2027 (Present)*

- Design the user interface and visual layout of the organization's website, creating a cohesive and accessible experience for prospective members and event attendees.
- Collaborate with the team to translate organizational goals and event needs into clear, engaging web content and page designs.
- Develop mockups and design assets that align with the club's branding while promoting its mission of supporting women in STEAM.

**Director of Technology**

*Bolt UBC | 2026 – 2027 (Present)*

- Collaborate with the technology team to improve the organization's website through UI/UX design discussions and feature planning.
- Brainstorm and propose ideas to enhance website functionality and user experience.
- Contribute to technical planning for events and initiatives by working with cross-functional team members.

**Events Coordinator**

*UBC AI Club | 2025 – 2026*

- Assisted in organizing and executing club events by coordinating event setup and logistics.
- Managed attendee registration, name tag distribution, and on-site event support.
- Worked with the events team to ensure activities ran smoothly and provided a positive experience for participants.

## VOLUNTEER EXPERIENCE

**Frontend Developer & Consultant – BOLT Consulting, BOLT UBC**

*October 2026 – December 2026 (4-month volunteer commitment)*

- Contributing to the launch of BOLT Consulting, a new multidisciplinary initiative within BOLT UBC providing pro bono consulting services to organizations.
- Developing frontend features for GenWell, a nonprofit organization, to improve website functionality, accessibility, and user experience.
- Collaborating with cross-functional team members to translate organizational needs into practical digital solutions and support project delivery.
- Contributing to the development of the division's initial client projects and helping establish a foundation for future technology-driven consulting engagements.
